Muhammad Aqeel

Sr. SQA Engineer specializing in AI-accelerated Playwright automation for POS & enterprise platforms.

SR. SQA ENGINEER

AWS Certified

Results-driven Sr. SQA professional with over **7 years** of experience in manual and automation testing across **POS, healthcare, web, VoIP and API** platforms. Specializes in modern **AI-assisted test automation** with Playwright, Cypress, MCP and Claude tooling, alongside strong skills in API testing, database validation, and production support. Passionate about leveraging cutting-edge AI workflows to deliver faster, more reliable releases in a forward-thinking, quality-focused organization.

Work Experience

Sr. QA Analyst

Oct 2025 – Present

Contour Software Pvt. Limited · POS — Food (US / Canada)

- ▶ **Manual Testing:** Test a restaurant POS platform for US & Canadian clients across complex flows — order types, payments, deferred orders, loyalty, and table management.
- ▶ **Test Coverage:** Run smoke, regression, functional, and UAT testing each release to keep core POS workflows stable.
- ▶ **Agile QA:** Author plain-language test cases & test plans, verify defects, and contribute as an active Agile/Scrum team member.
- ▶ **Automation Framework:** Built, scaled, and maintain the suite — migrating Cypress to Playwright with Page Object Model, fixtures, and parallel, cross-browser execution; continuously refactored for stability and reusability.
- ▶ **AI-Assisted Automation:** Drive AI-powered automation using Claude Code/CLI/Desktop, Cursor & Windsurf with MCP servers and Playwright built-in agents.
- ▶ **Custom AI Agents:** Engineered agents that read user stories, generate test plans & scripts, verify bugs, and auto-create bug tickets.
- ▶ **API & Reporting:** Perform AI-driven API testing across Cypress & Postman, with rich JSON, HTML, and Allure reporting for fast, actionable failure analysis.

Sr. SQA Engineer

Oct 2024 – Feb 2025

Eon OneByte Pvt. Limited · Healthcare Domain

- ▶ Led manual and automation testing for healthcare web applications, ensuring accuracy, reliability, and compliance with data-privacy standards.
- ▶ Designed and executed detailed test cases for critical patient-care and clinical workflows; ran functional, regression, smoke, and UAT testing.
- ▶ Built and maintained automated regression suites using Cypress, and used SQL queries to verify data integrity across the database layer.
- ▶ Collaborated in Agile/Scrum ceremonies, tracked defects in Jira, and partnered with developers on root-cause analysis.

HIGHLIGHTS

- 7+ years in QA across POS, Healthcare, Web & VoIP
- AI-assisted automation with Playwright & Claude tooling
- Manual + Automation expertise
- Mentored junior QA testers

Work Experience (continued)

Sr. Software Engineer — QA
Ibex Global Solutions Pvt. Limited · Lahore

Nov 2021 – Jul 2024

- ▶ Performed manual & automation testing across QA and production environments of web applications.
- ▶ Wrote and executed SQL queries for database testing using SQL Server and MongoDB.
- ▶ Provided customer production support, reproducing reported issues and identifying root cause through log analysis.
- ▶ Reported and tracked bugs using Jira; participated in sprint planning, demos, daily stand-ups, and defect reviews.
- ▶ Created SQL stored procedures and jobs to automate repetitive manual tasks.

Software Quality Assurance Engineer
Amigo Software Pvt. Ltd. · Lahore

Oct 2018 – Nov 2021

- ▶ Tested VoIP and call-recording solutions for call centers and other sectors.
- ▶ Performed functional, regression, UAT, smoke, usability, and GUI testing on web applications.
- ▶ Conducted REST API testing on Postman and SOAP API testing on SOAP UI.
- ▶ Extracted and validated data via SQL queries; reported bugs in Azure DevOps; mentored junior testers and improved QA processes.

Key Projects

POS Smoke Test Automation — AI-Accelerated
Playwright · Cypress · Claude + MCP · Agentic Testing

2025 – Present

- ▶ Converted time-consuming, manually executed smoke test cases into a robust automated suite for the POS platform.
- ▶ Replaced the slow traditional automation workflow with an AI-driven approach (Claude + MCP + agentic testing), **boosting automation speed by 70–80%**.
- ▶ **Reduced manual testing effort by up to 70%**, freeing the team to focus on higher-value exploratory testing.

API Smoke Test Automation
Postman · Cypress · AI-Assisted API Testing

2025

- ▶ Automated a fully manual API smoke test suite to **100% automation coverage**.
- ▶ **Cut the test cycle from 5 hours to just 20 minutes**, dramatically accelerating release readiness.

Achievements

- ▶ Achieved **100% automation** of a previously manual API smoke test suite — slashing the test cycle from **5 hours to 20 minutes**.
- ▶ Accelerated POS smoke-test automation by **70–80%** and reduced manual testing effort by **~70%** by integrating AI (Claude + MCP + agentic testing) into the QA workflow.
